

Setup 2.4 GHz: Virgin Media Super Hub

This guide will show you how to setup 2.4 GHz on your Virgin Media Super Hub or router manufacturer.

Not your router? Click here for more setup guides.

Step 1)

Open a web browser and type "192.168.0.1" into the URL bar then press [Return]/[Enter] to load the webpage.

When the page loads, login using the router's admin credentials.

Super Hub		Router Status	
Welcome to your Virgin Media Sup	er Hub		
	Sign in to view and change your settings Settings Password 2 WPS PIN 54749252 2 Sign In Dan't know your password or WPS PIN? w'll find your default password and WPS PIN on the bottom of your Super He	ıb.	

Step 2)

After logging into your router, click the "Wireless

Network Settings" button.

Step 3)

Locate the **"Wireless Band"** settings option and check the "2.4 GHz" option. For maximum compatibility, ensure that the 5 GHz box is unchecked. After setting these options, click "Save Settings".

Select a single channel for best results 1-11 ONLY

Easily change your wireless network security settings using the settings below.		
Wireless	On ○ Off 3	
Security Mode	WPA Auto -	
SSID	virginmedia87654	
	Up to 32 characters (case sensitive)	
Passphrase	12345678	
	Between 8 and 63 characters (case sensitive)	
Channel	Auto 👻	
Operating Channel	48	
Wireless Band Settings		
Selecting 5GHz may improve the performance of any wireless devices or adapters that support 5GHz mode. However, in this mode, devices that only support 2.4GHz mode won't be able to connect to your wireless network.		
Wireless Band	2.4GHz (recommended)	
Save Settings		

Step 4

After making these changes we recommend restarting your router so that the new settings can take effect.

Step 6 [optional])

Once your router has restarted and you're able to access the Internet again you can proceed to setup your "Ajax Online-smart Devices" .

For help setting your "Ajax Online-smart Devices" please contact us at support@ajaxonline.co.uk
